

Handling & storage of labelling printers and tape cartridges.

**With care, your labelling printer and tape cartridge should give trouble-free performance. The following points may assist.**

1. Read the instruction manual thoroughly before using the machine.
2. Store both machine and cartridge in a cool, dry place away from direct sunlight. Ambient temperature for tape storage should not exceed 25°C.
3. Load cartridge according to instruction on packaging.
4. Do not pull on tape, especially whilst tape is printing.
5. Do not cut tape while it is feeding.
6. Do not operate the machine with weak batteries.
7. Always wind tapes before use via the tensioning wheel on each cartridge as tapes can become loose in storage and transit.
8. Use only the power adaptor supplied with the machine.
9. Clean the machine print head frequently using Isowipes (available from Jabac) or methylated spirits and a cotton bud. Take care not to scratch the surface of the print head.
10. For assistance with machine or tape operation, call the Jabac Customer Service team on (03) 97200 700.
