MAKING SAFETY SIGNS EASY

As a global leader in facility signage, there's no other company that can help you communicate critical information better than Brady. We offer more than 12,000 different signs for safety, maintenance and facility identification. Brady signs feature bright colours, bold text and intuitive pictograms to ensure that the communication is highly visible and easily understood.

The signs are compliant with Australian standards and regulations, and have been designed to withstand the harshest application and industrial environments.

CUSTOMISATION

Brady recognises that every workplace is different and may require different Safety Signs products to suit its workplace environment.

We pride ourselves on our custom offering of signs and labels, which we produce in-house from our state of the art Sydney and Perth facilities. We work with suppliers and customers to find the right sign for the right purpose.

Your Guide to Choosing a Safety Sign Material

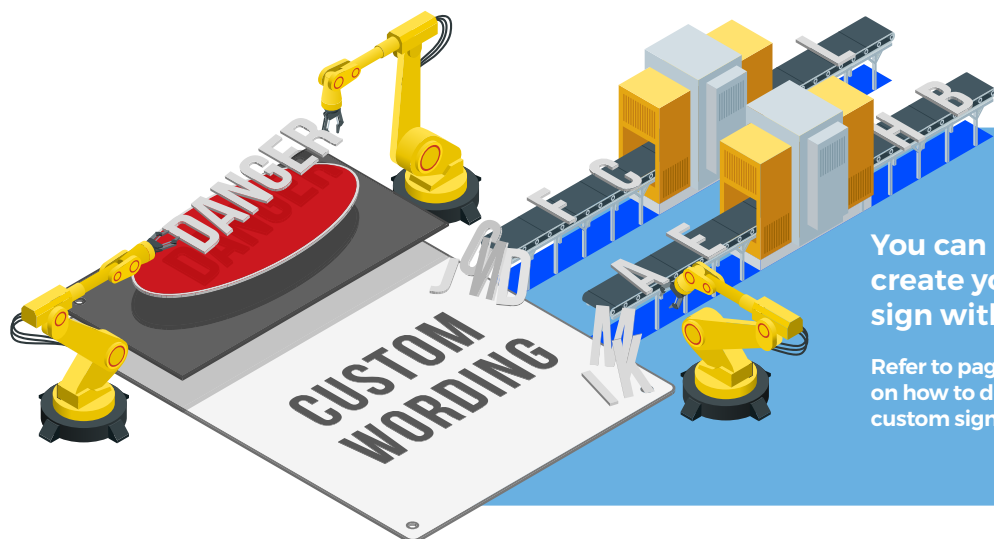

On the fence about which material to choose for your next safety sign? Check out this handy guide outlining four of Brady's most popular sign materials. We've stacked up our sign materials head to head to help you decide which one is best for your next safety sign!

1. Metal (AKA Colorbond Steel)			
	CONSTRUCTION	ENVIRONMENT	COMMON USES
 0.6mm thick	A strong, 0.6mm thick rigid material manufactured from Bluescope Colorbond® Steel. Standard with round corners and mounting holes.	Holds well in windy conditions, ideal for outdoors. Withstand temperatures of -40°C to 80°C and an outdoor average durability life of 5-8 years.	Entrance, exit, traffic, parking, building, construction, directional, safety, wall or post mounting.
2. Polypropylene (AKA Poly)			
	CONSTRUCTION	ENVIRONMENT	COMMON USES
 1.4mm thick	1.4mm thick semi rigid sign with rounded corners and four corner mounting holes. Made from 50% recycled material, this UV stabilised is one of our most popular choices!	Suitable for indoor and outdoor, resists fading and cracking. Withstand temperatures of -40°C to 160°C and an outdoor average durability for 3-5 years.	Directional, informational, departmental, safety equipment, special event, temporary construction, wall or post mounting.
3. Self-Adhesive Vinyl (AKA Labels/Stickers)			
	CONSTRUCTION	ENVIRONMENT	COMMON USES
 0.11mm thick	Flexible self-adhesive material. Can adhere to virtually any clean, dry surface. Well suited to flat or soft curved texture.	Indoor or outdoor conditions. Highly resistant to fading, shrinking and chemicals. Withstand temperatures of -29°C to 65°C and an outdoor average durability for 3-5 years.	Informational, directional, safety. On pipes, poles, containers, windows, equipment, storage racks, tanks.
4. Multiflute (AKA Flute or Corflute)			
	CONSTRUCTION	ENVIRONMENT	COMMON USES
 3mm thick	Manufactured from 3mm corrugated plastic. Lightweight, low cost and durable.	Ideal for short-term outdoor use but can also be used for indoors.	Ideal for temporary applications such as construction and building sites or retail signage. Tie to fencing, stick to walls or hang from ceiling.

Choosing Signs to Suit your Application

Complying with Australian Standards

THE AUSTRALIAN STANDARD

The Australian Standard® AS 1319-1994 outlines specific parameters for safety signs for the occupational environment such as workplaces. Our comprehensive range of more than 12,000 compliant safety signs helps you foster a safer environment by making compliance easy. If you need a safety sign outside of our stock collection, our custom sign production department will design and make what you need.

MANDATORY SIGNS

These signs specify that an instruction must be carried out. Symbols (or pictograms) feature in white on a circular blue background. Sign wording, if necessary, is in black lettering on a white background.

PROHIBITION SIGNS

These signs specify behaviour or actions which are not permitted. The circle and slash feature in red over the action symbol in black. Sign wording, if necessary, is in black lettering on a white background.

DANGER SIGNS

These signs warn when a hazard or a hazardous condition is likely to be life-threatening. The word DANGER features inside a red oval, which in turn is inside a black rectangle.

FIRE SIGNS

Fire signs advise the location of fire alarms and fire-fighting equipment. They feature a white symbol and/or text on a red background.

EMERGENCY INFORMATION SIGNS

These signs indicate the location of, or directions to, emergency-related facilities (exits, first aid, safety equipment, and so on). They feature a white symbol and/or text on a green background.

WARNING SIGNS

These signs warn of hazards or a hazardous condition that is not likely to be life-threatening. The hazard symbol features in black on a yellow background surrounded by a black triangle. Sign wording, if necessary, is in black lettering on a yellow background.

TRAFFIC & SCHOOL SIGNS

These signs comply with Australian Standard® AS 1742.1:2014. They are designed to protect people inside and outside car parks.

GENERAL INFORMATION SIGNS

Although Australian Standard® AS 1319 – 1994 does not refer to these signs, they're available due to popular demand. They communicate general information and often refer to housekeeping, company practices and logistics.

Viewing Distance Guide

Safety signs should be large enough to view without straining the eyes.

Follow this easy four-step guide to ensure your safety signs comply with Australian Standard® AS 1319 – 1994 and help everyone return home safely.

1. CONSIDER THE OVERALL POSITIONING

- ▶ Mount your safety sign in a reasonably prominent position, close to the line of sight when standing
- ▶ Place your safety sign against a contrasting background
- ▶ Ensure stacked materials won't block the sign under any circumstances.

2. MEASURE THE VIEWING DISTANCE

- ▶ The viewing distance is the distance between where the sign will be mounted and where everyone should sight the sign upon entry to the room or site
- ▶ To determine the best sign size for your situation, use the Sign Guide below
- ▶ Measure the viewing distance and apply it to the pictogram and text size below in Step 4

NOTE: THIS GUIDE IS ONLY APPLICABLE TO BRADY AUSTRALIA MANUFACTURED SIGNS DUE TO THE DESIGN OF THE ARTWORK.

3. CONSIDER THE LIGHTING CONDITIONS

- ▶ If your sign is unlikely to fall easily into the observer's line of sight in poor lighting conditions, you must increase the pictogram and text sizes by 50% (see Step 4)

4. SELECT THE RIGHT AND COMPLIANT SIZE SIGNS

- ▶ Australian Standard® AS 1319 – 1994 recommends the following minimum sizes when positioning signs prominently in good lighting
- ▶ Ensure pictogram size is at least 15mm per metre of viewing distance
- ▶ Uppercase text must be 5mm per metre of viewing distance
- ▶ Lowercase text must be 4mm per metre of viewing distance

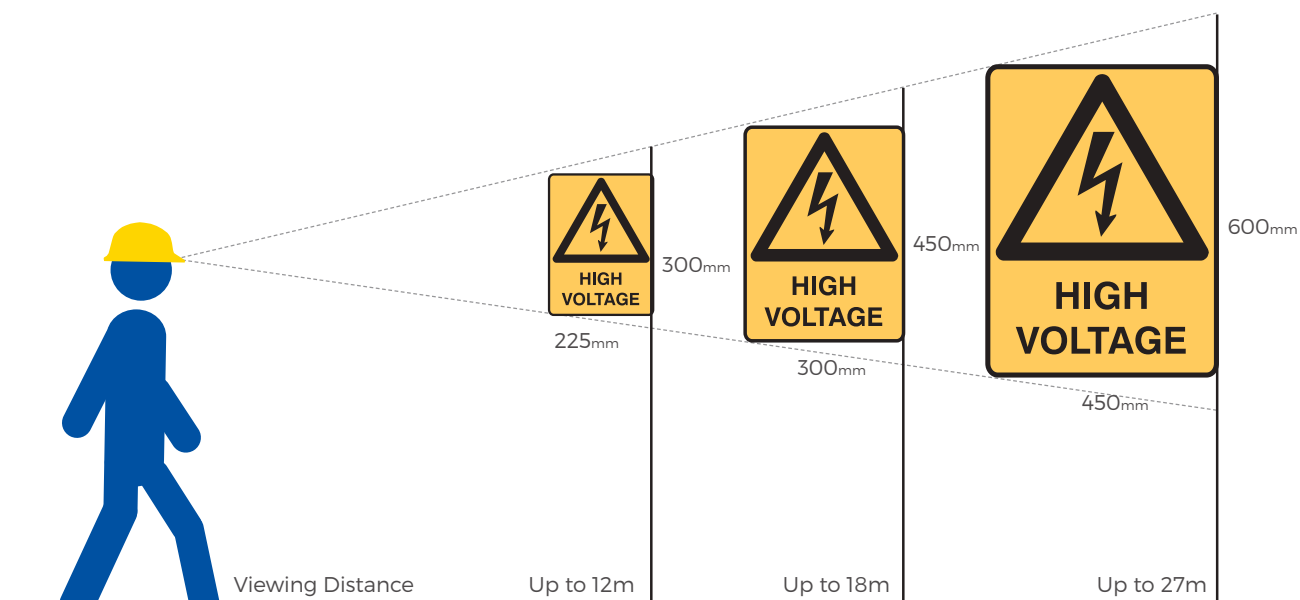

NOTE: When in poor lighting, increase above specifications by 50% to ensure sign falls readily into the line of sight.

Top Tips for Compliance

The AS 1319-1994 makes it the user's responsibility to maintain their sign for maximum effectiveness. Ensure a safety sign stays compliant by following these tips:

1. Regularly clean the sign with a wet sponge/towel and mild detergent. Avoid chemical cleaning products.
2. Replace damaged or illegible signs.
3. Install the sign in a well-lit area.
4. Do not block the sign from view.

LIGHT THE WAY TO SAFETY WITH BRADY EXIT SIGNS

Choose luminous signs where exits are not immediately visible to the occupant. Luminous signs are reactivated automatically by exposure to light and are completely safe – non-toxic and non-radioactive. Brady's range of luminous exit and evacuation signs are made from the latest in photoluminescent technology. The material was designed to provide safe LLL (Low-Level-Lighting) egress pathway to ensure the safe evacuation of employees during emergencies and in blackout situations. The BradyGlo™ material provides excellent glow times of 10+ hours without any mechanical or electrical power source after only five minutes charge.

CHANGES TO AUSTRALIAN STANDARD AS 2293 EMERGENCY EVACUATION LIGHTING FOR BUILDINGS

The modifications in this standard comes as a result of changing international trends. It now specifies the use of the "moving person" symbol developed by the International Standards Organisation, instead of the word "EXIT" on illuminated exit signs. Implementation of this change has now become part of the building regulations in the Building Codes of Australia (BCA) publication. However, it is not a requirement at this stage that all existing buildings or buildings already approved for construction to use the new sign. Brady recommends that you contact your local authority in your state or territory for information on your application. For more information, visit www.standards.org.au or www.abcb.gov.au

Wind Breaker Custom Construction Sign

- ▶ Move from traditional sign plastering and on to a Wind Breaker Mesh Sign.
- ▶ Wind Breaker signs are versatile and can convey multiple messages on a single sign for a tidy and effective solution
- ▶ Available in wind breaker mesh material
- ▶ Maximum dimensions: 1600mm x 50m

Constructed from lightweight and strong mesh, this sign is ideal for seeing through to construction. It can be hung on fencing and improves site presentation. Tiny holes in mesh allow for wind to pass through, reducing wind loads. From a short distance, holes are not viewable. Comes complete with eyelets, ready to be hung.

Vehicle And Truck Signs

Changes to Rear Marker Regulation

Effective since 1 January 2021, the new National Code of Practice for Rear Marking Plates (VSB 12) stipulates that all heavy vehicles and trailers must display rear markers made of compliant materials from Class 400 (Class 1), Class 1A and UNECE reflective plates. These materials are determined to be more durable and offered improved retroreflective performance than Class 100 (Class 2) reflective plates.

As such, fitting of new Class 100 (Class 2) reflective plates have been prohibited since 31 December 2020. Class 100 (Class 2) reflective plates currently displayed may be used until a replacement is required due to wear and tear, upon which the new material must be used.

For more information, visit www.nhvr.gov.au.

Rear Markers

- Meets Australian Standard AS 4001.1 and the National Code of Practice for Rear Marking Plates (VSB 12)
- Choose from Class 1 (Class 400) reflective aluminium or self-adhesive vinyl
- Aluminium material possess high resistance to corrosion and is the ideal option for outdoor signage
- Self-adhesive vinyl has high resistance to shrinking, fading and chemicals, and offers easy installation and high tack to a clean, dry surface

Surveillance Camera Signs

These signs provide a highly visible warning to thieves, shoplifters, criminals and vandals - an ideal deterrent for all areas of your facility. Use in areas where covert cameras are not easily visible. They form an integral part of your security system whilst reassuring customers, visitors and employees. Choose from three materials to suit your specific requirements; self-adhesive vinyl, polypropylene or metal.

Brady Engraved Signs

Communicate all your important messages with effective and durable engraved signs from Brady. Each custom sign is manufactured from a vast range of materials to the highest quality standards. Ideal for use in enhancing your office space and for the identification of industrial and electrical equipment, giving a professional and consistent look throughout your facility. Engraved signs are highly visible and are essential for long-term durability in harsh industrial environments.

APPLICATIONS

ELECTRICAL/INDUSTRIAL SIGNS

- Switch Plates
- Distribution Boards
- Manufacturing/Maintenance Details
- Machine Instructions
- Company Details

OFFICE ENGRAVED SIGNS

- Desk Signs
- Name Badges
- Commemorative Plaques
- Door Signs
- Directory Board Strips

REVERSE ENGRAVED

Sleek and glossy signage that will brighten up your interior and exterior. Reverse engraved is ideal for back painting, or giving a three dimensional appearance. The glossy surface is vandal resistant. Signs come with self-adhesive backing, for easy fixing. If custom pictos are required please supply camera-ready artwork.

TEXTURE ENGRAVED

Ideal for detailed engraving; it is extremely durable and resistant to fingerprints, smudging and stands up to difficult environments. Ideal for interior or exterior signage.

Brady custom makes your engraved sign on-site giving you durable, professional signs fast!

HOW TO ORDER A CUSTOM SIGN

Use Our Custom Sign Form

STEP 1

SPECIFY MATERIAL, SIZE AND FORMAT

Refer to the Standard AS 1319 to help decide what size best suits your application - For details on materials and viewing distances refer page 4-7.

STEP 2

CHOOSE LAYOUT AND COLOUR

Depending on the purpose of your sign, the message will determine the colours to suit the application.

STEP 3

ADD LEGEND TEXT / PICTOGRAM

Please specify font size if complying to a particular standard. If Pictogram is needed simply flick through the catalogue and note down the part number.

STEP 4

ADD FINISHES AND MOUNTING OPTIONS

If reflective, or any other options are required, please indicate all the added options for your custom signs.

STEP 5

ADD ANY LOGOS OR SPECIAL ARTWORK (OPTIONAL)

Email a print-ready logo or artwork. Additional charges may apply if artwork is not sent as print-ready.

ALL THE SAFETY AND IDENTIFICATION PRODUCTS YOU NEED

Consolidating suppliers can save you time and money. With so many brands under the one roof, we have over 50,000 products available. We want to make sure every single customer walks away from Brady with exactly what they are looking for.

IN-HOUSE MANUFACTURING AND FAST DELIVERY

We know speed of delivery is important. Our in-house production department runs at full speed every day, manufacturing a range of products from safety signs and labels, to engraved tags and wire identification products.

We have a dedicated team of 30 operators working 10 machines daily, so we can provide our customers with a quick turn around on orders.

OUR COMPLIANCE EXPERTISE

Our speciality is our ability to ensure our customers' peace of mind, knowing that their compliance obligations are fulfilled. We achieve this by delivering the latest information on relevant workplace safety, supported by our national sales team who are your trusted business advisors for workplace safety and compliance.

A CULTURE OF MAKING IT EASY FOR THE CUSTOMER

Our employees share common values like integrity and respect. We put our customer at the centre of everything we do, working with them to find solutions for their needs. We do this with friendly service because that's who we are.

WE OFFER ONLY BEST-IN-CLASS PRODUCTS

We ensure we partner with suppliers who share our sense of integrity and ethical practices. We partner with best-in-class local and overseas vendors, making sure we bring to market quality products that our customers can rely on.

UNIQUE PRODUCT OFFERING

Brady's global Research and Development with over 250 technologists allow us to focus on areas of strength and differentiation, expand our portfolio of products and continually invest in new technology platforms.

The content is provided as a general recommendation and should not be used as a substitute for information provided by your local State or Territory Work Health & Safety regulatory authority. The onus for assessing each workplace rests with all Australian individual workplaces and sites managing their own risk profile.

“ We do things others don't, in ways they can't. This is the Brady way. ”
