Prints on first label

No wasting labels with print smart technology

Print on every label or sleeve – no more blank first label. With print smart technology, the printer, labels, ribbons and software all work together for efficient label setup. It's all in the smart chip embedded in our materials – it stores the material size, type, color, quantity and compatibility, and sets proper burn settings, sensor alignment and print speed. When installed, the chip sends that information to the printer and desktop software and auto calibrates without wasting any labels – and you get fast material setup and creation, without the waste.

Get no-hassle, 20-second material changeovers

Forget fumbling around with ribbon rolls that are great at rolling away or threading material around rollers or print heads. Switch to a new way of material changeovers with the BradyPrinter i3300 Industrial Label Printer. The easy-to-load label rolls and self-contained ribbons snap into place for easy 20-second material changeovers without cumbersome sensor adjustments. Switch materials frequently throughout the day? You'll save time to work on your more important tasks.

Easy drop-in loading

Cryogenic Tube and Vial Labels (B-461, B-490, B-492 and B-7425)

FreezerBondz™ labels can be applied to room temperature or already frozen samples, with a small overlap. The label remains legible and will stick to the tube during processing, even when immersed in liquid or vapor phase nitrogen and ultra-low temperature freezer storage.

- **B-461 Self-Laminating Polyester:** Ultra-thin polyester label with clear overlaminated tail that protects print and allows liquid levels to be visible
- **B-490 Polyester:** White FreezerBondz label ideal for flat frozen surfaces. Adheres to frozen tubes and vials when wrapped around itself by at least 1/8".
- **B-492 Polyester:** FreezerBondz ultra-thin white polyester label for labeling of frosted/frozen or room temperature vials, tubes and canes. Superior chemical and abrasion resistance.
- **B-7425 Polypropylene:** Ideal for labeling dry, room temperature specimen containers. Material withstands temperature ranges from -196°C to 121°C (-320°F to 248°F). Chemical resistance to ethanol, DMSO, IPS, short-term xylene, 10% formalin, 50% acetic acid and toluene

Software for easier label creation

Innovation is at the core of our business. And software is no exception. Our intuitive software options make label creation even easier and more efficient. When you pair the BradyPrinter i3300 Industrial Label Printer with these software options, you get automatic label setup and guidance through the label creation process to minimize errors and make label creation a snap.

Brady Workstation Label Creation Software

Brady Workstation revolutionizes label and sign creation and printing by offering a variety of suites and apps that are easy and efficient to use. Choose and customize the tools you use to complete tasks exactly as you want without having to use print drivers. Try these software options:

Product and Wire Identification Suite – When you need to create product labels, wire and cable markers, and panel labels this suite is your go-to solution. It allows you to create basic text labels or labels with graphics and custom formatting and serialize and import data.

Scan and Print Suite – This suite allows you to consume data from a barcode scanner, keyboard or custom script to quickly populate your own custom label templates as part of a labeling workflow. Whether you need to replicate labels for lab specimens, re-label supplied parts for product assembly or label products based off work orders, this software suite can solve your workflow needs.

Laboratory Identification Suite – Ensure labels for all your lab samples and equipment are crisp, clear and contain all necessary information. Easily design and create labels for your cryovials, centrifuge tubes and bottles, conicals, slides and other samples in your laboratory.

Safety and Facility Identification Suite – Keep your facility safe and compliant with the Safety and Facility Identification Suite. This group of apps makes it easy to create custom signs, labels, pipemarkers, Lean / 5S labels and outdoor-grade facility labels. Choose this suite to add visual safety guidance to your facility.

GHS Labels App – Creating GHS labels is now surprisingly simple. We've streamlined the process so you can easily enter the data once from your SDS sheets, then create and print any size GHS label at any time. You can also auto-populate your GHS label using the built-in chemical database. Need labels with multiple languages? Those are also supported in the app.

Other apps and suites are available:

1. Go to **Workstation.BradyID.com**.

2. Fill the workstation with the apps and suites you want and leave out the ones you don't.
